

 Excom Society

WE ARE
EXCOM
SOCIETY

Society that should
have never existed

Supply: 6,666 NFTs

How to claim NFTs: Participate in IDO & get NFT for free

Launch: IDO launch on Cropper Finance (13th October, 2022)

From the dust of a burning world, society and the NFT market where pure faith was the only thing that remained left, Excom Society was born. Their purpose was as simple as web3 itself. To bring faith and powerful tool for everyone admiring Solana NFT space to grasp their opportunity to shine in virtual space, be part of the changing world and powerful DAO which will decide how big Excom Society will grow. The birth event of Excoms was so noisy that it got the attention of the game-changers from Solana NFT Space to merge paths and bring Excom Society onboard of their projects and virtual worlds to provide home and shelter for all Excoms that had to escape from the dangerous and burning world.

As the title suggests, Excom is an abbreviation of "Excommunicado". The meaning of Excommunicado is more than clear. It is a state of a former Continental member after their privileges have been revoked due to a severe infraction of the rules. When an individual is excommunicado, he loses all access to Continental services, including protection from other Continental members.

Excom Society members were driven out by force to find their own shelter in the virtual world and web3 ecosystem. Their only hope is to find their new owners thru a mint event that would save Excoms from eternal suffering. As a "Thank you" to their new future owners, Excoms promise to work hard (staking) and bring the holders regular income (\$GENZ) for their good faith by acquiring one of the Excoms!

However, black magic is still trying to overtake Excoms and erase them from the NFT world once and for all. Therefore every time an Excom is traded and gets a new owner, black magic gets stronger and stronger. As soon as they earn enough fuel (SOL) to acquire the cheapest Excoms freely offered on a market, black magic will instantly make a purchase and burn the chosen Excom instantly until there are 2,222 Excom Society NFTs left. Then the Black Magic dies forever and will enable Excoms' owners to gain extra income for every transaction that Excoms generate!

Excom Society

Collection of Excom Society aims to provide its holders several utilities, advantages in Solana NFT space and passive income by earning its own token via Staking and getting part of the royalties.

As an Excom holder you can expect to get access to:

- ⚡ PFP collection
- ⚡ Access to Data Analytical Tools
- ⚡ Integration and a Verified Collection in Heavenland
- ⚡ Staking
- ⚡ \$GENZ token
- ⚡ Share of the royalties
- ⚡ Merch
- ⚡ Liquidity Pool set up from raised SOL
- ⚡ Floor Sweeping & burn NFTs
- ⚡ DAO voting
- ⚡ Building a brand inside of web3 and metaverse ecosystems

PFP collection

Among others, Excom Society will represent a PFP collection that its holders will be able to place as a Twitter (or any other social site) profile picture and become a proud holder of Excoms which will increase holders' social status by holding one of the unique creatures that got saved from the dangerous black magic!

Heavenland Integration

Excom Society could not have grabbed the better attention than one of the Leading Metaverses on Solana blockchain - Heavenland. The Excom's brand will get integrated into the virtual world of Heavenland and will become a verified collection inside of HL's Paragon NFTs. Excom Society aims to heavily cooperate with Heavenland and successfully onboarded the Heavenland team as Advisory crew to use their great deal of experience and help Excoms to successfully launch and carry out Excom Society collection.

Besides the brand integration, Excom Society also aims to acquire Highrise parcels inside of Heavenland and build an anti-Continental Hotel that will be a safe heaven for all Excoms.

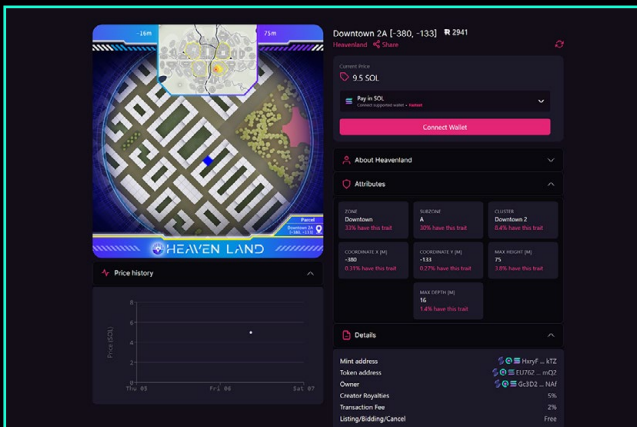

Data Analytics Tools

Excoms are the gateway to essential insights for the Heavenland metaverse. What parcel is it best to buy? What is the most impactful news, and how can it impact the NFTs and HTO price?

Excom Society has been developing Analytical tools to provide its holders unique opportunities

- ⚡ Undervalued Parcels and other assets listed on a Marketplace
- ⚡ Mini-games with the most significant upside potential
- ⚡ Businesses integrated into Heavenland overview
- ⚡ The most profitable opportunities/services in Heavenland
- ⚡ Overall Index of All Heavenland-oriented businesses (holders will be able to track „GDP“ of Heavenland economy in general)

The tools will take into consideration

- ⚡ location
- ⚡ traffic
- ⚡ the appetite of players to spend time on current parcels or playing certain games
- ⚡ all transactions and types of transactions in Heavenland
- ⚡ businesses creation and mortality
- ⚡ monetary progress and changes in the Metaverse

From all tracked data, Excom Society will provide outcomes available for the Excom Society holders.

1 Excom NFT will open part of the data, and another part will open with more held NFTs. To have full access to all data, society members must own 20 NFTs.

Also, if someone wishes not to hold NFTs, they will be able to pay a monthly subscription in GENZ to access all tools. However, the monthly subscription fee will be flexible and reflect the NFT floor price to drive demand for NFTs.

Either way, it is supposed to be one of the main streams of income for Excom Society. In the future, the analytical tools will cover other Metaverses and NFT collections to get the attention of the whole web3 space and drive demand for NFTs and our services even bigger.

Staking

As a redemption to Excoms new owners that saved them and gave them a place to hide, Excom Society promised to work hard and serve their owners forever in the form of staking. Simply grab your Excom and lock it in the dark place and let them work! The reward is pretty tasty! All Excom Society NFTs will be stakeable shortly after the mint is complete. Staking Reward will be in a newly created token called \$GENZ that will give Excoms owners regular passive income.

As default, all Excoms generate a fixed amount of 20 \$GENZ per day when staked.

You can upgrade your Excom by

- ⚡ 2,000 \$GENZ to earn 60 \$GENZ per day
- ⚡ 4,000 \$GENZ to earn 110 \$GENZ per day
- ⚡ 10,000 \$GENZ to earn 250 \$GENZ per day

By upgrading your Excom Society NFT it will add a special trait to the NFT which will give it more value within a collection and on marketplaces.

You will be able to stake or unstake your NFT anytime.

Share of the royalties distributed to holders

20% of generated royalties will be distributed to Excom holders in \$GENZ. Generated Solana will be swapped to \$GENZ and airdropped to holders based on the amount of held Excoms and its rarity. Later, Excom Society holders will earn 50% of the generated fees (details in Floor sweep & burn NFTs).

Liquidity Pool

Shortly after the \$GENZ token is created, the Excom Society team will set up a liquidity pool on Raydium to ensure first liquidity for \$GENZ. LP will be loaded from SOL raised during the Excom Society mint.

Merch

One can't build a brand without trendy merch that would fit its holders! Excom Society is going to release a high quality merch that will be paid in \$GENZ ONLY.

Floor sweep & burn NFTs

30% of Royalties generated from secondary marketplaces will be used to automatically sweep the floor and then burn the NFTs. Whole process will be automatic and as soon as the wallet has enough balance to buy 1 or more NFTs listed on the floor it will make a purchase and then burn the NFT forever until only 2,222 are left. After 2,222 total supply is hit, the royalties (30%) will be used to reward holders.

DAO voting

Excom Society is fully in control of their new owners! Stake your Excom NFT and become part of the DAO that will have the main power to decide the next steps and direction of the Excom Society. New collabs, WL raffles, Metaverse integration, acquiring assets for DAO? Become part of the DAO and decide what you want!

Building a brand inside of web3 and Metaverse ecosystems

Besides all the points and utilities explained above, Excom Society aims to build a powerful brand not only in Solana and web3 communities but also irl. Excom Society holders are becoming part of the ambitious brand that will serve their needs, wishes and dreams. The goal is to create a brand that holders will love and will spread within their communities!

Excom Society & Heavenland team

The team consists of 5 leaders focused on web3, marketing, communication, Solana blockchain and brand awareness that have spent years developing their own blockchain solutions and tokens. In addition to that, Excom Society successfully onboarded the Heavenland team to become part of the Advisory board. Heavenland is the most promising Metaverse that successfully launched 3 collections (Parcels, Loyalty NFTs and Alphas) and keeps building the virtual world with an incredible speed. The team has a great deal of experience in NFT space and web3 in general and will play a key role in Excom Society business development, IT advising, marketing and other.
